

## EXECUTION PLAN

### Project name: THE IMPROVEMENT OF THE QUALITATIVE PARAMETERS FOR THE WASTEWATER TREATMENT PROCESSES FROM THE FOOD INDUSTRY THROUGH ADVANCED CONTROL SYSTEMS

Year	Phases/ Activities/ Partners	Deadlines	Results/ Documents presenting the results	Human resources involved  (person x month)	Financial resources (Value)			Categories of expenses	
					Total	Of which		Program's budget	Other sources of financing (cofinancing)
						Program's budget	Other sources of financing (cofinancing)		
2006	<b>PHASE I:</b> (includes objective no.1) <b>Objective I:</b> Analysis through direct measurements of the processes in the food industry (for example in the milk, beer, sugar, oil industry) and the correlation of the wastewater composition with the phases of the technological process; determining the mathematical models for different types of water and their validation in numeric simulation conditions.	30.11.2006	Phase scientific report	25	57000;	57000;	0;	1/48500 7.2/6000 14.1/450 14.2/50 14.13/2000
